

West Michigan Cisco Users Group

We are excited to be kicking off a User Group here in West Michigan. We held a founders meeting on February 13, 2008 and have been working hard to pull together a leadership group and develop a framework for the organization moving forward. We hope to create a group that will be:

- an organization supporting the development and certification of network professionals.
- a forum for users to explore and participate in networking technologies and the IT industry.
- a community to help learn about best practices.
- a professional network free and open to all.

We are sorry some people missed our first informal meeting, but we are working hard to put together an organized meeting schedule and location along with a website, email address and everything that you will need to effectively communicate with us. That said, while all that work is ongoing we don't want to miss anything you have to say, so we have setup the following gmail account so that we can hear from the local Cisco/computer users.

WestMichiganCiscoUG@gmail.com

We will have a formal announcement available soon, but in the meantime please feel free to contact us if you just can't wait.

Thank you,

West Michigan Cisco Users Group
